

RECOMMENDED SYSTEM REQUIREMENTS - POS

These are the recommended specifications for computer hardware to run Smart Hotel Software POS. Slower computers may work with Smart Hotel Software POS, but user experience may suffer.

Windows XP, Vista, Win 7 Home or Win 8 Home is NOT recommended for any computer that will be using Smart Hotel Software POS as part of a network.

Please contact us to discuss your computer setup if you are not sure.

STAND ALONE COMPUTER (NO NETWORK OR MULTIPLE COMPUTERS)

1.5+ GHz P4 Processor (minimum)
1 GB RAM
100GB Hard Disc
More than 20% free space remaining on hard drives.
20" Touch Screen monitor
Windows Compatible USB Receipt printer and Cash Drawer
Windows 7, Windows 8, Win 8.1 PRO Home versions not supported
MS-SQL Express 2005 or Better
.Net Framework 4.5

A unit like the Dell Inspiron One 20 or 23 is perfect.

More RAM is required if other applications are on the computer – like PMS, Accounting, Call Accounting, email, spreadsheets, etc.

SERVER

2+ GHz Core 2 Processor (minimum)
2-4 Users 4GB RAM
5-8 Users 8GB RAM
100 GB Hard Disc
More than 20% free space remaining on hard drive.
Windows 7, Windows 8, Server 2008
MS-SQL Express 2005 or Better
.Net Framework 4.5

More RAM is required if other applications are on the server – like PMS, Accounting, Call Accounting, email, spreadsheets, etc.
